

Fish & Chips

Fish & Chips

Egypt Museum Tahrir Square - Cairo, Egypt

Who we are??

By following the rule of going outside the ordinary, we decided some time ago to create a restaurant that serves familiar foods to a specific group of visitors who do not like to take risks in eating. After studying the categories and searching for the types that we will offer, we found that chips and fish are the famous, quick, and light English meals, and that is what is required.

Our operation

We are fully aware of the lack of time for most visitors, so we have created a distinctive operating system in order to always ensure that meals are prepared in a maximum of three minutes, in addition to maintaining the quality and delicious crispy taste.

Our taste

Our chefs have added some modifications to the usual ingredients in order to achieve the distinctive and unusual taste of the ingredients, despite the spread of these dishes in England and most countries of the world.

Our mission

We are always keen to provide the most delicious dishes to reach the highest levels of visitor satisfaction and ensure that they are completely satisfied with the quality of our products and services to guarantee the best ratings and reviews and thus nominations for more customers.

Our vision

Fish & Chips

We seek to be a distinctive part of the tourist's experience in order to contribute to giving the tourist the experience he deserves in order to advance tourism and promote it more and more.
